The scores listed below are the average scores for the students in your program, reported in National Board equivalent scores. The scores have been standardized so that the mean=500 and standard deviation=100 for the total group of Adult Critical Care examinees (number of examinees = 475). To assess your residents' performance in context of the total group, keep in mind that the majority (about 67%) of the examinees scored between 400 and 600 on the total and subtests.
