Critical Care Medicine

The Intensive Care Professionals

To get started, visit sccm.org/hostedtraining or contact the SCCM Hosted Training Team at hostedtraining@sccm.org or +1 847 827-6888.

The Society of Critical Care Medicine's (SCCM) hosted training opportunities feature expert-developed learning and realistic training designed to meet the diverse needs of clinicians when caring for critically ill and injured patients.

BENEFITS INCLUDE:

Consistent training with flexible formats including in-person and online options

Specialized training to improve clinician knowledge and confidence

Dynamic presentations and interactive skill stations for a comprehensive learning experience

CE/ACE can be offered for additional value

Certificate of completion and course textbook

SCCM has funding available to provide financial support for all types of critical care training for organizations in low-income nations and underserved areas of the United States.

Improve clinician knowledge and confidence. To get started, scan the QR code, visit sccm.org/hostedtraining, or contact the SCCM Hosted Training Team at hostedtraining@sccm.org or +1 847 827-6888.

Fundamental Critical Care Support

Improve critical care with SCCM's Fundamentals courses. Designed for nonintensivists, future intensivists, or current intensivists seeking a knowledge refresher, the Fundamentals courses provide knowledge and training for healthcare professionals at all levels on the latest in critical care.

Help develop your institution's critical care workforce and increase clinician confidence when caring for critically ill patients.

Fundamental Critical Care Support

Equips healthcare professionals with the tools they need to provide bedside care for patients who are or may become critically ill

Pediatric Fundamental Critical Care Support

Prepares healthcare professionals to manage acute deterioration of critically ill pediatric patients for the first 24 hours or until transfer or appropriate critical care can be arranged

Fundamental Critical Care Support: Obstetrics

Expands maternal/fetal critical care training for intensivists and nonintensivists to improve patient outcomes

Fundamental Critical Care Support: Resource Limited

Addresses unique challenges encountered by healthcare professionals when resources are limited, including in rural and military settings and low-income countries

New! Fundamental Critical Care Support: Surgical

Provides nonsurgical healthcare professionals with the knowledge needed for the initial care, stabilization, and urgent disposition of the critically ill surgical patient

New! Fundamental Critical Care Support: Crisis Management

Provides healthcare professionals with the knowledge and skills needed to manage the critical care response to large-scale disasters

ICU Liberation

SCCM's ICU Liberation Campaign aims to liberate patients from the harmful effects of pain, agitation/sedation, delirium, immobility, and sleep disruption (PADIS) in the ICU.

Learn and apply evidence-based patient management strategies for the entire multiprofessional critical care team using the ICU Liberation Bundle (A-F), which has been shown to improve outcomes for patients and reduce hospital costs while transforming ICU culture.

Critical Care Ultrasound

Focused ultrasound examinations in the critical care setting have become an extension of the clinical assessment because of their rapid, precise detection capabilities. SCCM's hosted critical care ultrasound courses bring the realistic training needed to perform and interpret point-of-care ultrasound to your institution.

Critical Care Ultrasound: Adult

A broad, skills-focused course that increases ultrasound diagnostic skills and scanning proficiency

Critical Care Ultrasound: Pediatric and Neonatal

Designed for the unique point-of-care ultrasound diagnostic and scanning challenges faced by clinicians who work with pediatric and neonatal patients

Advanced Critical Care Ultrasound: Adult

Focuses on the specialty-specific use of echocardiography in the management of the critically ill patient and covers important cardiovascular information for the noninvasive management of the hemodynamically unstable patient

Available exclusively for the international critical care community:

Best of SCCM Congress

This course delivers the most popular sessions from SCCM's Critical Care Congress, exploring the latest knowledge, tools, and critical care topics.

Multiprofessional Critical Care Review: Adult

This course provides the most comprehensive field overview of the diagnosis, monitoring, and management of critically ill patients.

Bring Critical Care Training to Your Institution

SCCM has been training healthcare professionals for over 25 years!

"FCCS was the best and most comprehensive critical care course I have ever taken. The instructors were extremely knowledgeable and experts on the topics. This course made me more confident in taking care of critically ill patients."

— Kathleen Jenkins, RN

Over **150,000** clinicians trained
in more than **65 Countries**

Improve patient outcomes and reduce healthcare costs.
