

Dear PFCCS Associate Instructor Applicant:

Thank you very much for your interest in becoming an Associate Instructor in the Society of Critical Care Medicine's Pediatric Fundamental Critical Care Support (PFCCS) program. The PFCCS Program Committee appreciates your commitment to improving patient care through this course. The criteria necessary for Associate Instructor require that the applicant:

- ┆ Complete a PFCCS provider course with a test score of $\geq 80\%$
- ┆ Complete the instructor curriculum component
- ┆ Teach two PFCCS modules under the supervision of a PFCCS Consultant/Course
 - Director/Instructor. These experiences may occur in the same course or over one year's time, but they must be completed within that year
- ┆ Demonstrate significant clinical activity in critical care (ie, a 50% practice ratio in critical care)
- ┆ Submit the Associate Instructor application via the attached online form

Associate Instructors are not required to be SCCM members, but they must fulfill one of the following requirements:

1. Physician degree with critical care certification or proof of board eligibility.
2. Nurse with a baccalaureate degree and critical care certification or graduate or higher degree
3. Accredited school of pharmacy degree
4. Respiratory therapy degree

Criteria required to maintain the PFCCS Associate Instructor status require that the applicant:

- ┆ Teach an instructor/provider course at least once every two years or take a refresher course.
- ┆ Demonstrate significant clinical activity in critical care (ie, a 50% practice ratio in critical care).

The SCCM office issues provider certificates, maintains records on each Associate Instructor, and tracks faculty participation. A required minimum of two PFCCS Instructors must be present for each course. Minimum faculty requirements can also be met with one PFCCS Instructor (the Course Director) and two PFCCS Associate Instructors.

Thank you again for your interest.

Sincerely,

PFCCS Program Subcommittee

**PFCCS Course Instructor Letter
Documenting Practice Ratio in Critical Care**

Dear ICU Director:

This individual is applying to become an Instructor for the SCCM course, Pediatric Fundamental Critical Care Support (PFCCS). One of the requirements for this is to provide proof that he/she has a practice ratio of 50% or more of time caring of critically ill or injured patients within an ICU.

Critical care practice is considered either a didactic or education-based role focused on the critically ill or injured patient. The practice requirement ensures (as much as possible) that the Instructor will be comfortable with the majority of the PFCCS lecture components and skill stations and will be able to answer questions with credibility.

I affirm that _____ works a minimum of 50% of his/her work hours in the care of critically ill patients within the ICU.

Documentation of proof of practice in the ICU is authorized by _____
(Signature of ICU Director)

Date: _____

Thank you for your confirmation regarding this individual's proof of eligibility. This information will assist SCCM in maintaining highly qualified instructors in the PFCCS program.

Sincerely,

PFCCS Program Subcommittee
