## Fundamental Critical Care Support Skill Station Equipment List

### Mechanical Ventilation I
- Ventilator and circuit (graphic display on ventilator preferred)
- Test lung capable of altering resistance and compliance
- Gas source(s) as required to power ventilator

### Mechanical Ventilation II
- Ventilator and circuit (graphic display on ventilator preferred)
- Test lung capable of altering resistance and compliance
- Gas source(s) as required to power ventilator

### Noninvasive Positive Pressure Ventilation
- Gas source(s) as required to power ventilator
- Mask interface (nasal, oronasal, and/or full face masks)
- Helmet
- Ventilator
- Nasal cannula and tubing
- Test lung
- Gas source(s) as required to power ventilator

### Integrated Severe Sepsis A Scenario
This skill station may be conducted using any of the following, as available:
- Flip chart
- PowerPoint presentation
- Resuscitation mannequin
- Low- or high-fidelity simulators

### Integrated Severe Sepsis B Scenario
This skill station may be set up in one of these formats:
- Mannequin with the capacity to display vital signs
- Interactive software
- Airway management intubation equipment
- Question and answer scenario

### Integrated Airway Management and Hemorrhagic Shock Scenario
LCD projector or some method for projecting image included with skill station

### Integrated Traumatic Brain Injury Scenario
LCD projector or some method for projecting image included with skill station

### Integrated Hypovolemic Shock Scenario
LCD projector or some method for projecting image included with skill station

### Recognition and Assessment of the Seriously Ill Patient
This skill station may be conducted using any of the following, as available:
- Flip chart
- PowerPoint presentation
- Resuscitation mannequin
- Low- or high-fidelity simulators
